Dr. Md. Al Mamun

Professor

CSE, RUET

Sir,

Thank You for giving me the opportunity to talk with you and to learn about the Web Based Application Project (CSE 3100). I am willing to do a project about "Online Marketplace". I want to create a marketing website which will have various features. I am still learning and I have thought of some features and these are provided below. More features could be added later while developing. Some features will be:

- There will be products and customers
- Products will be shown to customer
- Customers can view/order products
- Product Owner can sign up/sign in
- Product Owner can upload any product picture with specific details
- To perform an order customer needs to give specific details
- After performing an order, customers can review it
- Review will be shown to other peoples

The Fields I'm interested is:

**Front-end Works:** Html, CSS, JavaScript

**Back-end Works:** Python, Django

**Framework:** Django

Sincerely,

Saifur Rahman
